INLET Complete type 23761/23771

## Step by step to optimal hand sanitation

### Efficient hand hygiene at the production entry

Controlled process flow

- Hand cleaning
  - 2 versions: Type 23761 with water/soap mixture
  - Type 23771 with water/soap separated
- Hand drying with high performance hot air blower with integrated F8 air filter (optional with paper dispensers)
- All-round hand disinfection with 4 spray nozzles
- Every step is visualized by a LED symbol light
- Potential-free contact to open automatic doors after completed sanitation process
- Units can be alternatively equipped with a two-arm turnstile supporting easier escape in case of emergency
- Option to connect time recording systems, signal horns, etc.
- Combinable with the ITEC Star Clean IV series
- Left- and right-hand version available
